

MOTHER TERESA SCHOOL

BYOD Device Requirements

The school recognises that funding BYOD can be a strain for families. To lessen the burden

- a new device is not required
- if you already have a mobile device at home ask the school if it can be tried before you purchase another device
- makes an ideal Christmas / birthday gift
- update a parent device and pass on the older device for use at school

Devices must:

- be an Apple iPad
- have wi-fi connectivity and Airdrop ability
- have enough storage to install the selected applications
- will need to hold charge for a minimum of 6hrs, to ensure the device is usable during the school day
- be secured in a protective case

Please note, an **iPad mini** is **NOT** recommended due to the screen size. iPad minis are not suitable for using the NAPLAN online platform which is predicted for 2018.
