

MOTHER TERESA SCHOOL

BYOD Device Requirements

The school recognises that funding BYOD can be a strain for families. To lessen the burden, keep these in mind:

- A new device is not required.
- If you already have a mobile device at home ask the school if it can be tried before you purchase another device.
- It could be an ideal Christmas / birthday gift.
- You could update a parent device and pass on the older device for use at school.

Devices must:

- be an Apple iPad
- have wi-fi connectivity and Airdrop ability (3G/4G network not required)
- have enough storage to install the selected applications
- will need to hold charge for a minimum of 6hrs, to ensure the device is usable during the school day
- be secured in a protective case

Please note, an **iPad mini** is **NOT** recommended due to the screen size. iPad minis are not suitable for using the NAPLAN online platform.
